Construction Related Environmental Policy Statement

As a small cleaning company **Lynk Contract Services Limited** has a limited ability to impact on construction related environmental issues. We have no design responsibility and by the time we arrive on site the construction phase is nearing completion.

However it is important that construction related environmental issues are considered and that we are responsible in carrying out our operations – in particular

- 1) Waste is segregated and disposed of as instructed by the main contractor and recycled where possible
- 2) Chemicals are used in accordance with COSHH assessments and disposed of safely
- 3) We do not harm any protected species (for example Bats) and bring any encounters to the attention of the main contractor.
- 4) We minimise our carbon footprint by the use of vehicle sharing or public transport subject to any restrictions due to COVID-19.

Scope

This policy applies to all employees, sub-contractors and suppliers that engage with the company and it is the responsibility of Christopher Hawkes to ensure that this policy is complied with.

Review

This policy is to be reviewed at least annually with the next review due in July 2021. It will also be reviewed in the event of any Environmental incident or changes to existing legislation.

Responsibilities

The responsibility for determining the Company's Policy on environmental matters lies with Christopher Hawkes

Christopher Hawkes - Director
